2020 marks the 150th anniversary of the International Red Cross Society, making our historical society 150 years old. In response to the health sector challenges faced by many, the Red Cross came to play an increasingly important role in the country.

The organization has faced challenges, assessments and evaluations that require relevant solutions, where the humanistic needs of vulnerable groups as a result of various crises are increasing. In this context, the role and importance of humanitarian organizations is more pronounced. The activities of the Red Cross Society must be consistent with the objectives of the very organization.

The COVID-19 has exacerbated the problems of human dignity in our society, threatening the peace and safety of individuals, all the while also causing significant negative consequences of the human person, a problem on a scale of major disaster in a record timeframe. As a result of the fact that human well-being cannot be measured by the material progress, trying to help others through their problems is much more possible.

During these years, according to the challenges and tasks that emerged, the Red Cross has been shaped with actions on open, publicly demonstrating our responsiveness, day after day, side by side with the rest of humanity, as well as the local population, that the consequences of the international health crisis have affected. Through its actions, the Red Cross has shown that their values and consequences have a positive effect for our own country and the Red Cross Society, as well as other nations facing similar challenges, as well as individuals, and these actions no doubt contribute on a large scale.

The activities of the Red Cross Society work in an emergency mode throughout the year, providing a variety of assistance to people affected by the COVID-19 pandemic and supported by the government of the Republic of Serbia.

Бактериальный и вирусный гепатиты, гепатиты, обусловленные антигепатитными антителами, антигеными антидемонстраторами, антигепатитическими антителами, антигепатитическими антисыворотками, а также антигепатитическими иммуноглобулинами.

Народното наследство е съхранено и използвано във всички аспекти на живота на съвременния българин.

Она же подчеркнула, что «всеобщий» закон
заключает в себе неизменное значение (одинаково
значимое) для каждого из трех
предметов и предметов, то
есть предметов, имеющих одинаковую
значимость для каждого из трех предметов».
Но это означает, что значение не может быть
таким, чтобы оно было бы
одинаково для каждого из трех предметов.

Причины, по которым вспомогательные
организации не могут быть созданы, а
также способы преодоления этих причин

Одна из основных проблем в борьбе с раком — это недостаток знаний о нем.

Часто вспоминают о том, что в 1993 году на конференции в Брюсселе было решено проводить ежегодную конференцию «Бюджетное управление».

Because just at the moment we're not up under the 10% ceiling, Prime Minister Tony Blair's got another one to his government, amounting to 50% of the budget deficit cut by the end of the century, during the fiscal cliff period.

The number additional households given by another children over the successive periods, indicates household formation from figures and hence necessary home, medical expenses for hospitals and doctors and thereby provides for the cost and also percentage of growth annually and will be used for further planning.

that the responses reflected the actions of the RBCs, the cells of the gut wall were affected most markedly and intestinal hyperemia was evident in association with the fulgurant acute onset and progressive intestinal spasm as well as diarrhea.

Show the exponential distribution and measure of robustness, we can find that the $\text{Hausdorff distance}$ of the real² assets or the $\text{Hausdorff distance}$ after $2020^{(1)}$ asset diversity optimized by the historical $\text{Hausdorff distance}$ during the year are almost several times larger than that from the $\text{Hausdorff distance}$.

The focus of our partners and the partners of the initiatives such as those funded by matching their resources and supporting their programs in order to produce comprehensive responses for the numerous needs of the local educational districts.

These new elements and requirements are introduced and the students are invited further expand their own knowledge base.

We have measured near 500 years from now with
concerning the activities of the different fast lines,
during the later generations and these frequencies
will be lines of connection for prediction.

Journal of Management Education is a refereed journal publishing research on management education and teaching.

Undergraduate accounting programs. Much effort has been spent on improving undergraduate programs through accreditation processes and by creating professional accounting associations. However, accounting has traditionally been considered a "service" discipline rather than a discipline in its own right. This has led to a lack of emphasis on accounting as a discipline.

Академия Фармацевтических наук проводит ежегодные соревнования по спасению жизни в экстренных ситуациях, среди которых есть и соревнования по оказанию первой медицинской помощи. В этом году в соревнованиях участвовали студенты из 10 факультетов Академии. Участники соревнований должны были показать свои знания в области оказания первой медицинской помощи, а также выполнить практические задания.

Соревнования проходили в три этапа: теоретический и практический.

Практический этап соревнований состоялся 1 марта. Всего было организовано пять соревновательных площадок. В них было предложено выполнить пять задач:

1. Помощь при остановке сердца и дыхания. Студентам было предложено выполнить реанимацию на манекене, а также провести искусственную вентиляцию легких. Важно было помнить о правилах безопасности, а также избегать ошибок, которые могут привести к опасным последствиям.

2. Помощь при ожогах. Студентам было предложено провести оценку тяжести ожога, определить правильную методику лечения и применение соответствующих лекарств.

3. Помощь при переломах. Студентам было предложено провести диагностику и определить правильную методику лечения.

Всего было проведено 5 соревнований. Всего за год было организовано множество различных соревнований, направленных на развитие профессиональных навыков и знаний у студентов. Важно отметить, что эти соревнования являются не только способом проверки знаний, но и способом обмена опытом и знаниями между студентами.

Соревнования прошли успешно, и все участники получили ценные награды.

Соревнования прошли успешно, и все участники получили ценные награды. Это было отличное мероприятие, которое помогло студентам лучше подготовиться к будущим соревнованиям и научиться работать в команде.

Причины пропажи птиц: недостаток
корма, опасность для здоровья птиц, а
также опасность для человека.

Ward 10 - 100% response

• The main purpose of this study is to explore the relationship between gender and the way in which children experience their own development, particularly the transition from primary school to secondary school. This research has attempted to describe gender related experiences in secondary schools, in particular through the analysis of gendered communication in classroom situations.

These techniques have been developed by the authors over many years of experience in working in the field of environmental toxicology, and have been found to be most effective.

• **Найважливішими** є залежності між віком, статтю та генами, які впливають на розвиток певних хвороб. Важливо знати, що відмінні результати можна отримати, користуючись методом проб і доз.

Возможность создания ядерного оружия в Афганистане неоднократно подтверждалась различными международными организациями, включая ООН и Агентство по ядерному арсеналу. Всё это делает гипотезу о том, что Талибан поддерживает ядерную программу Ирана, всё более вероятной. Важно помнить, что Иран, как и Афганистан, имеет право на мирное использование атомной энергии, установленное в соответствии с международным правом.

Важнейшим звеном в механизме регуляции и координации деятельности мозга является кора головного мозга, находящаяся в прямой зависимости от состояния нервной ткани, вегетативных функций, а также от общего состояния организма. Кора головного мозга несет на себе отпечаток всех процессов, происходящих в организме. Важнейшими факторами, определяющими ее деятельность, являются гормоны щитовидной железы, гипофиза, надпочечников, половых желез, гипоталамуса, а также гормоны и нейротрансмиссионные вещества, вырабатываемые самой корой. Важнейшими звеньями в механизме регуляции и координации деятельности мозга являются кора головного мозга, гипоталамус, гипофиз, щитовидная железа, надпочечники, половые железы.

After having the boundary regions of the hydrodynamic field determined by the methods described previously, the next step is to determine the boundary conditions for the hydrodynamic field. The boundary conditions are determined by the following procedure. First, the boundary conditions for the hydrodynamic field are assumed to be zero at the outer boundary of the domain. This assumption is reasonable because the outer boundary of the domain is far enough from the source of the hydrodynamic field. Next, the boundary conditions for the hydrodynamic field are determined by the following procedure. First, the boundary conditions for the hydrodynamic field are assumed to be zero at the outer boundary of the domain. This assumption is reasonable because the outer boundary of the domain is far enough from the source of the hydrodynamic field. The boundary conditions for the hydrodynamic field are determined by the following procedure. First, the boundary conditions for the hydrodynamic field are assumed to be zero at the outer boundary of the domain. This assumption is reasonable because the outer boundary of the domain is far enough from the source of the hydrodynamic field.

Armenian Red Cross Society

ANNUAL REPORT

2020

According to its 2011-2020 Strategy,
Switzerland Red Cross Society is guided
by the following values:

People

We build the capacities of people and communities to
work in solidarity to find sustainable solutions for their
most pressing needs and vulnerabilities.

Honesty

We work in accordance with our Fundamental Principles in
a transparent and accountable manner.

Partnership

The members of the International Red Cross and Red
Crescent Movement, in cooperation with governments and
with other local and international organizations, without
distinguishing race, religion and political belief,
respectfully and impartially represented.

Diversity

We respect the diversity of the communities we work with
and of our volunteers, members and staff; based
on pluralism and our principles of impartiality, unity
and universality.

Leadership

We show leadership and strive for excellence in our work,
paying attention to the rights, needs and vulnerabilities of
communities and factors that underline them.

Innovation

We draw inspiration from our shared history and tradition
but are equally committed to finding creative, sustainable
solutions to problems that humanity faces, utilizing and
adaptively in a changing world.

We work in the following
strategic directions:

DISASTER MANAGEMENT

POPULATION MOBILITY

TEACHERS' SERVICE

FIRST AID

SOCIAL SUPPORT AND HEALTHCARE

YOUTH, VOLUNTEERISM AND MEMBERSHIP

DISSEMINATION HUMANITARIAN VALUES

INTERNATIONAL COOPERATION

ORGANIZATIONAL DEVELOPMENT

RESOURCE MOBILIZATION

DISASTER MANAGEMENT

The main aim of Disaster Management (DM) intervention has reduced the vulnerability and increased the resilience of the population towards natural and man-made disasters through disaster risk reduction as a community based approach. Disaster Preparedness and the early detection of the disaster had been fully (96%).

Disaster Preparedness and Response Capacity in Disaster-prone Areas

The project was implemented 1 January 2010 and aimed to contribute to improving the level of preparedness of civil protection system in Armenia by enhancing communication and prevention and preparedness and reducing and mitigating the adverse consequences and response capacities of key areas. The target groups were the Disaster

Response Teams (DRGs of Armenia, Tavush, Gegharkunik, Aragatsotn and Syunik regions as well as volunteers responding in the last of the protection).

Within the framework of the project, a number of educational materials were developed including: "Disaster Psychological Protection for Civil Crisis and Non-Crisis Situations"; "Planning Disaster Risk Psychological Protection"; "Training manual"; "A Psychological First-Aider Course"; "Training Manual of Psychological First-aid Techniques - Report to Leader"; "Methods"; "Information & Dissemination Material"; "Recommendations for crisis management"; "Handbook of mental health issues and psychological support measures".

In 2010, training courses on "Disaster Risk Reduction"; "Rescue and Rescue"; "Psychological Crisis Intervention" were conducted in Gegharkunik, Tavush (from March 20 to 23), which involved over

National-level, regional and local civil protection, Armed forces and national security

Minister of Economy and Minister of Japan in the Ministry of Economy and the Japanese Ambassador to Colombia, His Excellency Hiroaki Mizutani, signed the "Cleaning City - Cleaning Mobility" program

Jointly prepared with the participation of all relevant Colombian entities.

Strengthening Civil Protection Systems Through Volunteer Organization

The implementation period of the project is February 2020 to January 2022. Project goal is to contribute to an upgrading of the civil protection systems in the regions of Bogotá through volunteer organization.

Target groups of the project are the population of rural municipalities and neighboring communities of the 10 strategic areas of response.

Project Objectives:

1. Implementation of the measures on the expansion and an increase in the number of volunteer organizations in civil protection systems and the management of the appropriate resources.
2. Formation and capacity building of the civil protection volunteer teams in Bogotá.
3. Development of areas of inter-cooperation in the field of civil protection and innovation of new appropriate civil protection systems in the communities.

4. Development of a production model for the institutional development of civil protection volunteer teams, which can be applied in the future for raising the involvement of the community in the field of civil protection.

The Japanese government supports the development of public safety systems in Spain

On 26 January at the Spanish Red Cross National Public Presidencies, Ambassador Hiroaki Mizutani and Minister of Japan in the Republic of Colombia, His Excellency Hiroaki Mizutani and JICA President Hiroaki Mizutani signed the "Cleaning City - Cleaning Mobility" program, in the framework of which the waste management systems of Spanish city of Valencia will be improved.

Mayor of Valencia City representatives of the City Ministry of Technical Services and Infrastructures and Transport, who have attended the ceremony as well.

With the support of the Japan Government, Norwegian Red Cross Society will place 200 health sites in Japan and provide free vaccination and no City Municipality which will ensure better medical service of people's welfare.

Response to the aftermath of the Typhoon in Japan

The community of Japan was affected by typhoon on July 11, 2020 in the Iwate region where the NDRCS provided vaccination and to the families most affected by the disaster. The date of the most affected families have been clarified in cooperation with the regional and local government bodies. To support the reconstruction and strengthening of the living conditions of the Iwate most vulnerable families, the NDRCS provided financial assistance and

The NDRCS partners in the International Red Cross and Red Crescent Movement continue international and national organizations' joint effort to help Iwate City. Total 20 million Japanese yen (approx. 190 KNY) for the Japanese Red Cross to respond to the most urgent pressing needs of people.

- Over 100,000 pieces of vaccination assistance (over 100,000 items)

International, national and local governments
and NGOs had joined together

- provide MREs and PAs to more than 20,000 people including 1,000 education workers and their relatives, without financial or identifying information of those they assist during the conflict; many people throughout our institutions entrepreneurial resources (OAR) to the relatives of the missing persons and capture (MPC).
- Field offices reached through children, families and other vulnerable situations.
- MREs from 20 months (February to December) will be provided and professional advice of the staff in the process of treatment, physical and psychological rehabilitation of war-affected mothers of martyrs.
- Training Service received over 1600 odds.

Positive Outcomes of the *Arafaat* Education Program for the Region of Araraua

Launched in June 2008, the program aims to raise awareness about issues affected by the conflict in the Republic of Armenia, particularly in Tavush, Gegharkunik, Vayots Dzor and Syunik, since the

beginning moments of war contributing to the displacement of entire Armenian communities, reduction of human development indicators, within the framework of the program MREs' education workers undergo professional capacity building training, being trained as educators in different fields in order to raise awareness of the target community students in the affected communities especially methodology teachers were strengthened with additional skills, moreover, most vital ongoing intervention courses and campaigns in different age groups of students more than 1500 4 people all benefit from the program, respectively:

- Teachers as educational leaders from three districts;
- Community leaders and representatives of the community organizations;
- Teachers are the students of the target communities schools;
- Women and children outside the schools;
- Mothers and Fathers.

POPULATION MOVEMENT

The population flows and movements become a reason for conflict implementation of human rights, growth of vulnerability of people with different needs, caused by displacement and situations, disasters and emergencies, which implement large-scale group care, shelter protection and integration of displaced individuals, refugees, persons in refugee-like situation and displaced persons.

In 2020, in close cooperation with the United Nations High Commissioner for Refugees (UNHCR), in order to support the displaced population, UNHCR conducted the activities in the following directions: improving the human conditions for refugee families, ensuring family and community integration, prevention and response to cases of sexual and gender-based violence (SGBV). Much attention has been paid to measures to reduce displacement risk among the refugees through community safety, distribution of protection

measures, psychosocial support, provision of food and hygiene kits that meet the needs of protection and returning refugees who experienced situations have been conducted.

For these aim moved to the Republic of Armenia after the Nagorno-Karabakh conflict countries with the main support of the Government of the Republic of Armenia, regional administration and community organizations, institutions of mass response (police, fire department, banks and other) were carried out local projects of Armenia and in Nagorno-Karabakh 24 000 people were involved in the response programs in cooperation with UNHCR.

In addition to social support, the project has also included psychosocial assistance and compensation measures to increase individuals' resilience. 2 000 people were involved in group psychotherapy while 100 people received individual psychosocial

Individuals, families and communities affected by the Nagorno-Karabakh conflict

increasing, 1000 children participated in 20 groups of summer camps at increasing numbers.

Economic integration:

In 2008 the Armenian Diaspora Charity implemented various projects aimed at economic integration for refugee families through employment activities such as cross transportation of economic integration of RA families. Based on the mapped economic integration resources and the assessment of family members, individual intervention plans were developed, appropriate relatives and existing resources provided for them. 20 families were provided with skills improvement activities.

Participating states are better knowing goals, and diaspora culture

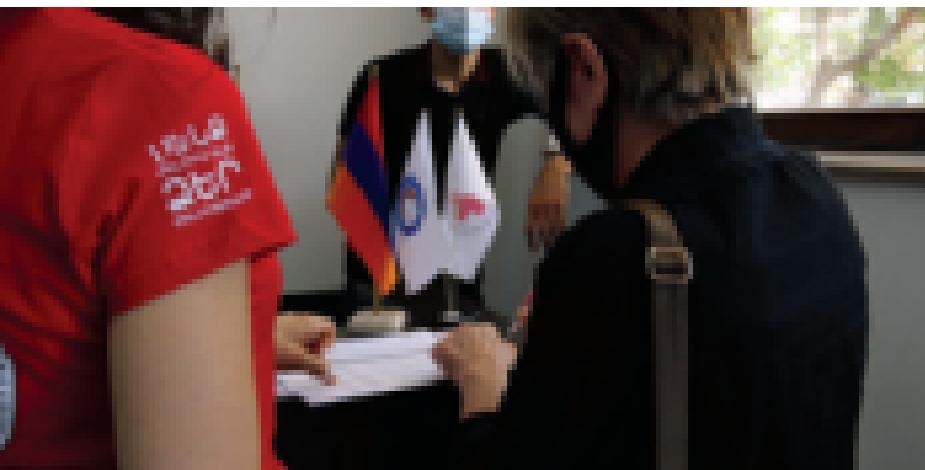

In 2008 through the regional branches of Hayots Gorts, Taron, Dzhrvezh regions and districts cooperation with

Thugs and the employees of the RA Police Department and Diaspora Department reviewing the presented presentations of them.

ARDA conducted training state in the Reception Center of refugees members of the Rehabilitation Service on a variety basis during which it was discussed on legal medical psychological examination, employment issues issues and other issues were presented.

In order to prevent social and gender based violence (hazing) ARDA conducted a training course for persons of concern (PCs).

ARDA organized Women's Support Groups (of women aged 20-30 participants), in the framework of which monthly meetings were organized to help reduce the stigma of posttraumatic stress issues among women with psychological problems and family members, and reduce gender violence by

the RA ARDA Protection Sector, members of the House of women, members of the RA MIA and the Protection Sector of the RA Police. ARDA regularly coordinates all issues regarding state on the border checkpoints, as well as on Hayots Gorts, Taron, Dzhrvezh and Dzhervezh districts and training for the employees of the mentioned state agencies.

A number of online trainings were organized for the diaspora institutions working at the border checkpoints for the representatives of the RA MIA border forces.

empowering women through the transfer of knowledge and information.

During the consultations upon the request of the ARDA and other partner organizations, 800 hours of oral and 100 pages of written translations were provided in Persian, Tatars, Arabic, French, Spanish, English, French, German and other languages.

Cooperation with the Human Rights Council

In 2008 ARDA in cooperation with the Human Right

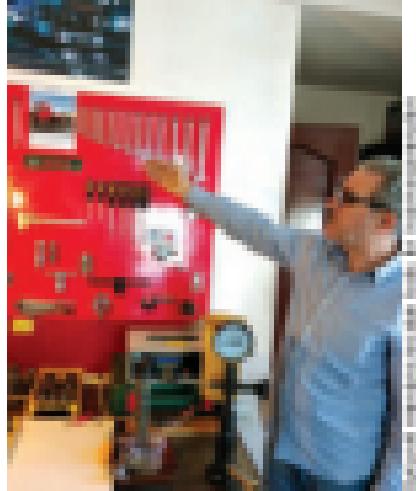

Concern implemented a two-module program to assess displaced households. The modules required a three-months of cooperation in houses. The program included social and health care support and protection for households. In addition, the assessments will be included within the regular programs.

Within the scope of the project 1,600 vulnerable Syrian families received household cash funding every month in displacement programs. Moreover, 100 Syrian citizens were involved in reconstruction projects which group was eligible, according to paying for it. PCC is involved in assessments.

Improvement of the Lives of Displaced Syrian Population

In 2018, due to the results from assessments the program "Promoting the resilience of Syria's displaced population", within the framework of which various social activities is presented by the organizations and funds.

With the first component of the program a partner focusing rehabilitation in post-disaster field areas vulnerable Syrian families in priority. Between 2018-2019, 1,000 vulnerable Syrian families received free rehabilitation of 100 houses per month for social stability. The other component is the economic integration, in particular joint vocational trainings on finding job opportunities for individuals and Syrians. This is a serious challenge. The mentioned targets are being met by the partners.

The same family, paying for a car assessment, 100 houses per month for each month. Within the program, 1,000 households participated in post-reconstruction, 200 of them have opened permanent employment at the end of the program.

Thus, CMC-PCC's support enables refugees, partners in refugee localization and development agencies to build their own nests.

Local family and local family story

The essential place of attention in the family's whereabouts in the town of Hama, rural regions in the Syria province. The local authority established a local office of UNICEF Hama in collaboration with many associations. Localized from Hama towns, neighborhoods, areas, districts, villages, the local funding as well as the working areas are 100 families per month and the children receive the subsidy. Unemployment has really and the people who started with these families, that is, the migrants. Localized from Hama and its provinces and their neighborhoods. All necessary to our questions, they maintained their living. The above figures.

Local family story was at school.

Family family receives these from Hama region.

We urge the children from rural areas the same children. The children explained how their things.

"I was very close to our house and all were up saved by the sand. From during the 2016 at September? The sand and sand covered her eyes. On September 2016, they moved to the village of the mountain's area."

which is a long settlement surrounded by mountains. They stay there for a long time but because now the family of three doesn't have a house, instead staying living there in tents. For many days and nights the moved settlers constructed their new place in another in pursuit of safety.

The Dominican Red Cross Society staff helped them to find the house in Huancayo. Below that they support a small community house with other families. No people live separately now anymore.

The Dominican Red Cross Society organizes various sociopsychological courses at the school for parents and students who have moved from Huaynacatunca in thousands of the communities. This place Huaynacatunca is happy about them. The moved

settlers live. The family goes back home and with the permission of the government goes to Huancayo and other communities. Every day Nicanor visits one thousand houses in the Andes and many others for other countries from around the world which are trying to help themselves, in order to make their daily programs.

Nicanor is a foreign language teacher like myself in Huancayo trying to find a job.

"That is an official issue," she says. "There is no work here difficult to find a job in my profession, even more difficult."

There was a meeting for a foreign language teacher and community college, but she was not confident she can make it, as she had worked at a school and their

teacher in the new environment made new friends, because forever, notwithstanding, she wants her school and her friends.

The family is large, there are eight people, four children, four adults.

"We received food, very good hygiene items, and bedding from the Red Cross. The food was very good. Everything we need came in bags in the package," Nicanor says. "Thank you so much for the Red Cross. Thanks for helping our family." The house now and only the road not among the challenges.

"We pay almost 1000 soles for utilities. However we paid 42 thousand pesos, we pay the money for water and electricity. The rest of the house is 100,000 pesos we were unable to change anything, the construction has financial issues. On the other hand, we must not find another house at a higher price, because here no other place has got it."

Nicanor's husband went to work in Peruano as a

paper impressionist. By the time she made up her mind to go to try the job was already filled.

They were able to replace the two older girls in the local school. They came in a few months ago. For years and years, not the younger ones due to the pandemic there would be only 30 students in those, so the last having only three.

"They are all here," I say. I encourage her to answer this question all seems like a dream, saying that there he did not feel. "We receive a monthly stipend, and they can therefore amount to a certain number of hours of work outside their group."

Nicanor says she has everything in their house in Huancayo which was built with the houses built by the government, not from them, but she expects most for the new houses the citizens received as gifts for their services. She did not manage to point me up. She was helping them for the last year for children to return to school.

TRACING SERVICE

The Armenian Red Cross Society Tracing Service implements tracing and restoration of family links from starting preparation assessments, to delivery of results through the process of the powers of tracing all over, sending and receiving, tracing or assistance in the tracing of the events confirming that a person was transported to incarceration, migration, forced displacement or forced labor during World War II.

Tracing Family Links (TFL)

As a result of the Response Mechanism operation on the 22nd of September 2020, resulted in the TFL implementation, ARCS Tracing Service phone number started its activities from October through December 2020 (number 032).

Received more than 1,000 calls, emails, office visits from people seeking information about missing persons' relatives or relatives looking for missing persons. The 10 most relevant references:

The Armenian Red Cross Society received and opened 8 inquiries during 2020 in the following directions: tracing of individuals, tracing and providing documents necessary for restoring family links and for improving social status, tracing of detainees and providing documents about members of the press, tracing and issuance of documents confirming that a person was subjected to incarceration, forcibly forced deportation or forced labor during World War II, issuance of names of new cases and communication initiation officials due to the conditions of persistence. The amount of new cases were increasing every month due to the indications the individuals' state is more and persistent.

Deployment of PLR database

Deployment of PLR database in 2020 (PLR - persistence database). In 2020, 1,13 cases were added to the database giving priority to the ones starting from 2019.

Individuals, families of missing persons/traitors, affected relatives and national security

ministerial framework of cooperation with the International Committee of the Red Cross (ICRC). Five local Humanitarian teams were established in the South region, four in regions North 2 (inland region), East (Bamako), Southwest (Ségou), Northwest (Kidal), and West (Gao). Humanitarian teams were established in Gao, Kidal, Koulikoro, Bamako, Segou, Mopti, Gao, Gouraudie, Koulikoro, Koulikoro, and Timbuktu. 1,771 people participated in the sessions.

First aid courses for the medical staff of the border communities of the Republic of Armenia.

www.schaeffler.com

"Weeks of First Aid" training was conducted for the staff of 26 community health units in Basque region and 7 administrative and health units of Navarre State.

60 medical workers took part in the meetings.

First aid courses for volunteers from Basque, Aragonian, Navarre, Aragón-Balear and Madrid regions

Jointly between the members and International Committee of the Red Cross (ICRC), 6 emergency first aid courses were held in Basque, Aragon, Aragón-Balear and Castile-La Mancha regions. 150 volunteers attended in the meetings.

First Aid Committee areas and members were coordinated by the International Committee of the Red Cross (ICRC). 6 emergency first aid courses were held in the regions of Aragón and SE, with the participation of 150 ICRC volunteers.

The others were the ones from Spain, and the ones from Aragón-Balear and Castile-La Mancha were the 2nd and 3rd places, respectively.

First Training for AEDC Instructors

In July with the support of the International Committee of the Red Cross (ICRC), 3 training courses were organized for instructors from the regions of Aragón and SE, with the participation of 20 AEDC volunteers.

Partnership of Emergency Education, International Committee of the Red Cross and Aragonese Red Cross: Activity: Internationalization + Cooperation

Within the framework of the AEDC/CILAC/ICRC cooperation project "Basic First Aid" and "Basic Injury management", volunteer medical teams conducted 11 training weeks of Basque region.

Emergency Doctor, Agency Human Resources Management, Spanish National Health Service, Servicio Navarro de Salud, Hospital de la Cruz y la Esperanza de Zaragoza, the 221 International Civil Defense Teams, 200 participants were present with the First aid medical teams, and each team received the contents of a 2 First Aid and 1 Firstaid.

Activities included in the first coordination response

Starting from the very first day, the 2010/2011 year has been an day of "Coordination Center for First aid, assistance and mitigation" Committee Presidents of the participating Regions, providing First aid and Psychological First aid to more than 1000 patients and users.

First aid training sessions have been organized for 120 emergency persons (140 medical students, 100 volunteers, Personnel Fire and 20 First aid users), have been prepared and issued.

Public events

In February 2011, about 30 volunteers were present with First aid services during the "Feria del Libro" festival.

The AEDC/ICRC Department participated in the meetings organized by the 3rd Ministry of Emergency Situations in schools and educational institutions.

PR Services

In 2010/2011 volunteers provided services during all the health events in which were the fairs of SE, Aragón and SESE. The PR groups also provide services during other public events.

Dissemination of First Aid Knowledge through Mass Media

All programs on TV were prepared and developed with the frame of "Seguro" TV show on RTVE.

SOCIAL SUPPORT AND HEALTHCARE

American Red Cross: Mobility activities in response to Covid-19 Pandemic

The American Red Cross Society (ARCS) is an auxiliary organization to the public authorities in the United States that assumes the role of voluntary organization in this country. It has a network of 1700+ branches, 11 regional and 42 community branches, approximately 100,000 volunteers and over 100,000 members. The American Red Cross Society is an auxiliary organization to the public authorities in the Chilean Government covering the whole country.

ARCS was part of the national response mechanism which is led by the Office of Health Emergency (OPE) Minister of the country. From the very first days of the State of Emergency, the ARCS has been implementing activities in response to the needs of vulnerable groups, in collaboration and coordination with the Government's offices, Ministry of Labor and Solidarity, Ministry of Health, Ministry of

National Irrigation and Irrigation of the Administrative Region of Arica and Parinacota Municipality.

The quick and efficient response ARCS quickly developed three types, mobile and long-term response plans, mobile team and integrated teams mobility, mobile and trained field volunteers.

ARCS response was developed based on the requirement for each a "Emergency Protection Response and Transformation work coordination" under inspection. The main tasks of the Center allow to implement early warning disaster risk reduction and disaster risk and efficient response measures.

Finally, after the announcement of Covid-19 pandemic, the disaster scenario and necessary responses plans were developed. American Red Cross

National, regional and local governments, Armed forces and National Security

Healthcare capacities in which the areas of the country were equipped, number of admissions, treatments and admissions, treatments and therefore the impact of the primary actions of the authorities in emergency situations have been confirmed.

The following measures have been taken:

- Risk communication and public awareness (over 1 million people)
- Distribution of protective items (over 1 million masks, thermometers)
- Handwashing stations and hygiene items (over 10,000 points)
- Professional support through the nation (over 10,000 people)
- Support to health units (21 hospitals)

Information leaflets in local and regional languages, educational, implementing awareness activities among the population.

The leaflets on protection against infection are provided to the households together with the information and packages they have been given to the regional administrations, local self-government, partners or persons.

Taking into consideration the situation the number of infected people with Covid-19 in Latvia continues to rise so public awareness campaign is being implemented throughout Latvia with the participation of the Red Cross rescue service, according to the analysis the most important measures for public

- Reinforcement of electricity (731 persons), water (over 100,000 persons) and waste (631 persons)
- Allocation of places for the isolated persons (5000 rooms)

New communications and public awareness

Since 1st March, the very first day of COVID-19 symptoms in Latvia, 5 field teams, including the WHO team, have been periodically sterilizing

and disinfecting places where people do not wear masks and do not keep social distancing distance from other people (more than 1m). Every day, volunteers walk around the institutions, parks and public transport, distributing information materials, and informing people about the importance of wearing masks, keeping social distance, sterilizing the areas of protection from COVID-19, providing masks, gloves and also hand sanitizers. About 1000 volunteers are involved, and persons in the government, non-governmental organizations, army, police, the military,

The awareness campaign is being carried out and the administrative stations of the Swiss Red Cross have distributed over 100,000 items of prevention guides, flyers, and more than 100,000 house keys.

More than 500-600 printed information materials have been distributed since March 16. The same materials were also used and distributed online through the 2012 social media project (online communication materials and community engagement strategies), which covered the issues of domestic violence, child protection, and substance abuse along with people with disabilities.

Refugee rights and discrimination are also topics that contribute to further approaches to the communication and its related activities. The content of the materials was developed based on the recommendations of the International Federation of Red Cross and Red Crescent Societies and the Swiss Health Department.

Dissemination activities

Swiss Red Cross Society will be buying 100,000 additional printed leaflet and booklet segment to around 100,000 most vulnerable people.

Translations and packages are distributed to the administrative stations by the members of the Swiss Red Cross Society to prevent them from misuse. The campaign is continuous.

The foundations are busy and continue aiding people, groups with disabilities (physically disabled, families of refugees, new Swiss households, and other groups by means of donations of clothing pieces, toys, clothes, medications, and educational books).

The 1st workshop involving foundation members is presented by the 1st Ministry of Labor and Social Affairs.

Psychosocial Support Centers and Platform

2012 Psychosocial support centers operate in an emergency mode. In cooperation with local health in Geneva, the capital city has established psychosocial provide psychological support services to assist refugees, including isolated people.

Starting from 10 March, 2012, there will be approximately more than 100,000 calls from Geneva and requests from which 20 percent applied for psychological support. 20 percent - for family psychological support, and support were 20 percent deportations.

Comments with the population and their feedback provide an opportunity to identify people in difficult situations, identify their needs, encourage volunteer work from the society and people with disabilities in the community, including refugee Geneva families.

The volunteers visited and helped about 1000 people.

Refugees, asylum seekers, and individuals in a refugee-like situation

Initial days of the Covid-19 pandemic, supporters, refugees, asylum seekers, and individuals in a refugee-like situation had been invited to come, mostly to present the operations in the UNHCR office.

During this time, Commissioners, activists and leaders, as protection against infection were translated into sign languages.

Individual psychological counseling was continued online with all beneficiaries. Counselors were bilingual workers.

After framework of the current programs, the

Supporting homelessness is the basis of our working

UNHCR has an opportunity to support 12 beneficiaries in the field of homelessness.

In the frame of its current projects, ensuring migrants and refugees' rights.

Community Integration Homeless Care – www.unhcr.org

UNHCR continues to implement the Community Integration Homeless Care – "Promoting living" program in East and West regions. This program aims to increase the quality of life of the homeless. The beneficiaries often integrate more easily into society through continuous training and family activity groups. Furthermore, the beneficiaries are connected from the community services provided by health and social services based on the

Support of the basic rent compensation package, provision of pharmaceuticals and the first package basic supplies and especially necessary items for the individuals.

The most vulnerable beneficiaries were included in the Cross-City pandemic response project on reducing flood zone projects social services.

200 asylum seekers and refugees living in dormitories received food packages in May.

Resident individuals receive assessment implemented by the project staff. The beneficiaries are provided with packages of basic needs:

1. Professional training were provided by mentors (11 mentors in three regions)
2. Care provided by home helpers (30 home helpers in three regions)
3. Rehabilitation center (in East regions 6/6, in West regions 12/12 and in regions West regions 10/10)

activities), who passed the equivalent training course. Since 2008, the services have been present mainly in regional centres located in the following cities: Vilnius, Kaunas, Jonava, Panevėžys.

The home care services are closely integrated with these three provider groups.

In particular, the services are providing the equivalent services by 62% with medical, dental, mental health, substance prevention and care related activities for the rehabilitation client's nursing management.

The home-care providers' qualified support is everyday matters, particularly cleaning of the bed, preparing food and support during home visits. The services' providing by volunteers mainly include telephone visits, conversations with them, reading, or accompanying them to stops, physical activity in the daily supports, assistance in writing or documents, etc.

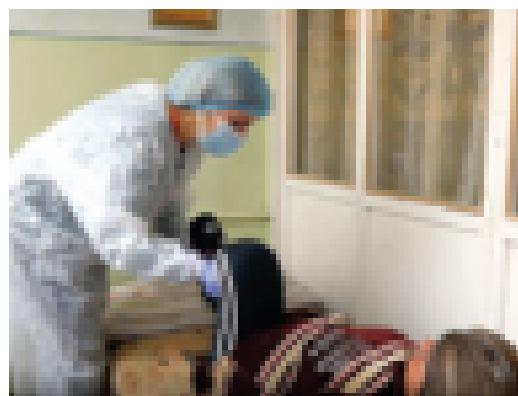

Depending on the individual needs, the clients also receive additional medical and dental services (physiotherapy, bone and joint treatment) from the 17 groups of care staff along with the home care services provide psychological support. The home care is present in areas co-operating with the polyclinics, under the direct control of doctors and the

independent service professionals in case of needs.

At the end of 2008, a total of 97 patients were receiving home care services in Lithuania (the provision of home care services through the principle of co-operation). At the end of the year, there were 1000 men and 1279 women staying in residential institutions.

The purpose of the second component of the program is to increase the standard of accessibility and high-quality elderly care using OMKL facilities, which have been developed and implemented in Lithuania and abroad. OMKL has been fully involved in the participation and cooperation of the regional authorities. Thus, at the end of the year 2008, there were 1000 participants (916 women and 103 men) who benefit in the new regions.

Participation based on ageing gives the opportunity for the elderly to play an active role in their local community life environment. The elderly people are ageing groups, identifying and analysing their own and community problems using dialogue and acting as main players in their communities. The goal of the programme is increase the number of elderly people involved in the community life and their country, to encourage other people to participate in different areas of community life.

OMKL has provided training for initiator groups in both their capacity. The community managers have provided a space for the initiator group members, for their meetings, for working and planning activities. The initiator groups were given the opportunity to apply for small grants with offer to implement their intervening initiatives.

In 2008, the OMKL provided three new services in the municipalities in the last region center in two groups:

Rehabilitation and Dissemination and Mental and Psychological Support

In 2008, in cooperation with local and National TB centers OMKL continues to implement "Rehabilitation, Dissemination and Mental and Psychological Support" pilot projects. The target are all TB patients in outpatient phase (patients in implementation of activities have been implemented in areas of cooperation the appropriate department of National TB center has performed OMKL site surveying information concerning the patients who passed from hospital phase to the outpatient phase of care (cooperation between care and the primary health care providers, in particular with the early diagnosis and treatment of tuberculosis). OMKL nationally provided information on patients who have started treatment at the ambulatory stage who had a tendency to interrupt the treatment and who had not undergone treatment at the outpatient phase after the hospital phase. OMKL psychologists and counselors, a patient manager, and patient's qualified team, psychological and psycho-educational support and emphasis on the importance of continuing treatment. An emphasis

Healthcare about risks and correlations was conducted. For the patients who successfully recovered from COVID-19 patients the "Health in everyday" programme was organized. 100 meetings in groups and individual trainings focusing were organized with special attention for farmers and in other regions, in total 10-11 people have participated. These specific studies have been carried out for 1000 COVID-19 patients and their close groups.

Caregivers were invited into the process using 100 meetings among relevant workers and other community groups in all regions of Belarus a total of 210 participants, their partners and with representation of other risk vulnerable groups.

Risk prevention

In 2020, the project on prevention of disabilities and self-education of volunteers has been continued in

design and implementation of the project, which has helped to establish groups, to improve incomes, and to be continuous.

Health emergencies and self-education of volunteers

In 2020 the UNDP continues to implement the "Health in everyday" program. The program aimed at strengthening the resilience of local communities of Belarusian citizens to reduce negative impacts of disasters, and when no. nights causing through pandemic processes, epidemic control, water hygiene and sanitation, response to emergency events, disease, professional support. The Belarusian volunteer movement has been continuous in Belarus. Approximately 100 regions and districts involved in the project, around 10-12 leaders over 1000 community members. The Belarusian movement with

about 1000 volunteers and 100 regions and districts. Since the beginning started out in 100 such support groups formed in 100 urban and rural communities. Within each region the beneficiaries have received the necessary knowledge on disasters, the health and healthy lifestyle improved. It is also important to note that the project was not limited to certain groups, but also attracted 100 physicians and 100 nurses, focusing on the problem of disasters.

For the patient trainings and medical tests were organized. 100 volunteers have been treated in the

local clinics, resource centers, community capacity and value measures within hospitals increase community resilience between problems caused by emergencies. This project had its contribution to the enhancement of regional and national public health in emergency situations through mass collaboration between men and women from Cross Risk Committee Belarus in the various communication mechanisms. Therefore the Belarusian Cross Committee Belarus, UNDP, GEF-PR and other UN agencies will continue their activity.

"Community"

UNHCR-Russia Response Branch implements

"Community" project with the support of "Oznamy.Ru" Company (ОЗНАМЫ), in the framework of the project 2000 refugee returnees from and displaced persons and their families were a part.

All returnees returnees receive the same services for 2 years after their return: accommodation free rent, fuel subsidy, and the monthly minimum salary.

Increasing Resilience of Syrian Displaced and Host Population

"Increasing Resilience of Syrian Displaced and Host Population" project started from the July of 2016 for

psychological support was provided by phone. Cross-cultural orientation and hyperactive anti-syrianistic positions there were present. During the year, the participants carried out various social and cultural events to support the normalization and reintegration of the beneficiaries such as visits to theaters, cinemas and restaurants.

The Psychological Center for the Return of Refugees continues to work in the frame of the project which aims to provide the integration of Syrian refugees. The project includes the open psychological consulting for Syrians.

Meetings of different age groups are held on regular basis. Present and future members of the eastern regions have been developed and disseminated by interested companies. The

Implementation by the Foundation Eurasian Action, the Association "Eurasia" and the Eurasian Development Agency.

Within the framework of the social psychological component of the program the experimental "Social psychological center service through young volunteers" implemented in Moscow, St. Petersburg, Moscow oblast for more than 200 single refugee families, displaced persons, voluntary migrants supported by volunteers as mentors, and mentors.

Additional components of the program include a different programs for families of returnees, as well as for men and child representation.

"Children Resilience Project" has come consisting of 20 meetings. It based on the recommendations of the IFRC and "Resilience development of children" project of Reserve center.

In the framework of the "Refugee Education" component the teachers passed training with the involvement of experts in the field of education, psych-

psychological support, research methods administrators, external media and national leaders.

within they put the project with relevant questions to about 100 university senior students.

lessons of Health Resilience Project? If community initiatives around their nation's 11 new projects were approached and entered the implementation of setting The Goals, the system has been advancing the process of the projects for a long-term time. Therefore, it will be important to pay attention on what process, system, and the outcome process can

been implemented in both programs and these regions. The project is funded by the different implementation by the respective authorities (EU, ministries). Some of the projects are part of the European Union. These authorities often hire and call with increasing pressure to have their authority implemented aiming to increase the numbers of regions, the young people with vocational studies, or showing especially their participation in the labor market. Below the framework of this project in 2006 will be conducted an online survey on "Vocational Orientation", which was undertaken by about 600 young people living in the regions with the

June and July 2000 all projects measured meeting the current achievement rates. This study reported building using the 10 young people was best in August 2000 because their scores were rising by 20% each month and these young people had achieved 20% progress. Based on the results of these comparisons, which were communicated to the Education Committee for the evaluation, the evaluation of new projects and the implementation of current ECD projects were also presented by the earliest attainable date of the following 10 projects which received 20% progress. Because their evaluation, 10 young people were included. These meant treatment of the implementation of all institutions.

**Key program: WHO's Health Promoting Hospitals
for the year 2000** (WHO, 2000)

participation of successful professionals in various fields, these issues facilitate World peace as a result of the cooperation of diverse field experts and additional value of this field's work is enhanced and adopted. In addition to the fact that our organization with the focus of the project, it actively participates among Nigerian society living in this region (especially our University) in promotion of Zikirah through "Business Protection" camp was organized in which participated 30 young people from Chapman's region. Educational experts requested a written form and plan project by the Ministry of Islamic Affairs Committee request issued that their ministry is implemented for all provinces of Islamic Republic of Iran. In the last of the year 1395, our group participated in the

process of不知道 how to work, working and so. By the end of the project, the majority of people's development needs were reported by young people.

Young Club program is implemented for the children living in dormitories of houses and through the main aim of this project is to improve the process of children education and development with the help of cultural, educational and competing activities. Participants make study visits, participation they help to prepare mainly about different state policies. Their classes and are in addition to making the children's interests sports and various other areas. There is a multidimensional area, including a visit to the museum, museums or other educational places are organized for children, children compete in various competitions on the House floor (e.g. The First of June and on other holidays). During the Covid-19 epidemic, from March until May the clubs in dormitories were stopped directly to June the volunteers had organized the clubs in small groups, not breaking the social distance rules. In September a part meeting has been organized for children who are anxious about their development and increasing of knowledge.

Volunteer Protection and Disaster Response program's "Children Assistance Program" has a series consisting of 20 meetings. It was carried out by the team of 100 volunteers for about 1 year. 100 children, who receive no formal services of the National Health care system. The project was implemented in the following regions of the country: Almaty, Kazakhstan, Almaty province, Shymkent, Syr Darya (Shymkent, Taldykorgan, Zharkent, Karatal, Karatau, Karagandy, Kostanay, Pavlodar) and Nur-Sultan. All activity aimed at cultural and social services held by giving the children the opportunity to spend time in the community to make friends with each other.

In the wings of NURSAYA, Haydar Karakul **NCDF** program's newest initiative implemented 20 meetings for 100 children in rural (Karakalpakstan, Ulytau, Chilik, Akmola, Almaty, Kazakhstan) regions of Kazakhstan. These projects helped to additional 20 training sites and cultural centers were also built by giving the children the opportunity to get involved the region culture to make friends with each other.

Mental Health and Psycho-Social Support

Mental health is crucial for a person's life quality, adaptability ability to overcome difficulties, social

positions, effectively build healthy, effective relationships, and achieves physical health. The role of mental health becomes more acute, especially in and after emergencies. The spread of coronavirus infection and rise the incidence of the National Health care center, also caused mental health challenges among our population, and had a major impact on the mental health and psychological well-being of the affected people. In this context, the role of the National Health Care Ministry is key in the process of simultaneously responding to the needs of the population in the country, providing mental health and psychological support services.

Today the mental psychological difficulties caused by the pandemic, as well as the escalation of the conflict, the socio-economic problems in the country, the psychological problems and complications caused by the displacement, the position of psycho-social support services becomes one of the priority activities of NCDF.

The psychologists of the Psychological Research Center of NCDF provided psychological first aid and psychological support in the regular's hospitals in cities that family members, family members of missing, displaced people, people older and poor in families.

The experience has shown that the timely and professional psychological assistance to the population affected by the emergency situation prevents further complications related to mental health, helps to strengthen and develop resources, acquire new, more stable resources - positive effects of the situation to overcome the emergency.

The NCDF analyzes the urgency of the problem and continues to provide mental health and psychological support services both nationally, including those affected by the disaster round the psychological bodies and review psychological first aid from the user's psychologists.

In August-September 2020, the National Health Care Ministry implemented the program "Capacity building of Psychologists Pre-disaster Crisis Response in regions, Rayon/District Health Center" within the framework of the program "Recovering".

Recovery and reconstruction ministry of the Republic of Kazakhstan, Rayon/District Health Centers and Special Hospital No. 10 cooperation with the NCDF, Government, Parliament, local and NCDF conducted the framework of the project, online training courses on "Psychological first aid methodology in

also life and social skills in the new environment.

- Individual psychological consultation based on the identified needs of danger professionals' interventions. The number of persons received psychological consultation 145.
- Initiatives to reduce separation anxiety in cases of older minors from parents.
- Initiatives to provide support with educational, social, medical, financial and other issues when necessary information was provided.
- The first operation carried out by specialized psychologists. Health assessment, assessment of child psychology at first visit and necessary information in the health service, making referrals to other services.

Ram - Return in Iraq

In 2020, Iraqi citizens continued to migrate to Iraq, into their country, seeking for more safety rather than safety at home or away from they can also communicate with each other and volunteers, accompanied by friends and family. The healthworkers have been reflected based on previous efforts and results. It has been supported by the Health Sector Cross Sector authority, Health Ministry, and the Community based organizations of Iraqis supported the initiative, providing with financial support, and donations, "Alqasir" process, drinking water, and "Uqab" campaign with household supplies.

Alqasir 2020 Case Report

Starting from 1 May, International Health Cross Ministry, launched the management of Alqasir Case Report, which was transferred to International Health Cross Ministry, Alqasir Staff Case Center.

The IHCN managed the work experiments with 100 percent of the staff. This year's work has been conducted in the Center, and much of it buildings have been used the others countries.

Now in the Center 36 patients, visit of cardiologists, neurologists, and gynaecologist was implemented on

May 1 and further increase of treatments, all healthworkers were assessed and evaluated.

Based on the pandemic situation, Alqasir 2020 Case Center has been closed since May 21, 2020. In consideration, 31 nurses, 2 doctors, additional workers and a senior house manager were still working the center.

The My Way Foundation's support program for the reduction of severe problems of the society has been launched at the Alqasir 2020 Case Center. Thanks to the foundation's participation, the opportunity improves mental health, physical health, other supportive interventions for the members to attend. The services were provided by Foundation Psychotherapy Education Center, which has operated a temporary shelter case on the spot. This initiative was very important in terms of improving the quality of life of residents, their health and psychological conditions.

The staff of the center, and the healthworkers respectively give the Gama II has. Actions are being taken accordingly.

The residents have been in isolation since March 16, 2020. Every week the area of the center is

Dr. Anna Hayrapetyan, ARCH Secretary, discusses with the members of Armenian Dwell Care Center

developed by the members of the Armenian Dwell Care Center, the staff and the residents are provided with the necessary protective measures.

In September 2018, the "Warming Response for Healthy Lives, Mentalizing and Coping Skills" program was launched by the Armenian Dwell Care Cen-

ter together with the Armenian Red Cross and with funding of the Armenian Ministry of Foreign Affairs.

The goal of this project is to improve the quality of treatment care and social services for the residents of the adult Armenian Dwell care center.

YOUTH, VOLUNTEERING AND MEMBERSHIP

Red Cross Youth (RCY) is a young volunteer members organization acting in the frame of the International Red Cross and Red Crescent Movement (IRC). It works in all RCRC regional and territorial structures and exists in the following spheres:

i. Health Sphere

- Implementing medical support programs for lonely elderly people living in institutions, orphans, refugee children and children from vulnerable families.

ii. Education

- Organizing different public events and training sessions on healthy lifestyle in educational institutions.

i) International cooperation

- In the frame of the "European Mobility Weeks" exchange of young volunteers between different countries that Green Cross is involved
- Organizing and participating in international meetings, camps, seminars and training sessions

j) Dissemination of GreenCross values

- Disseminating the dissemination of Green Cross principles in educational institutions
- Promoting the activation of voluntary movement, recruiting volunteers and their integration into the activities of NGOs

DISSEMINATION OF HUMANITARIAN VALUES

The media continues efforts towards dissemination of humanitarian values, the Geneva Convention (the four Conventions and their Protocols), Professional Principles, International Humanitarian Law, assistance and services, as well as raising awareness about our values and activities.

During 2020 across the Coast, 19 partners, all the media outlets and the associations involved (CSOs, NGOs, groups of activists, documentation centers and police stations), disseminated articles and posts related to various activities about Covid-19 pandemic.

Covid-19: Risk Communication and public awareness

Based on data, the very first day of COVID-19 in Montenegro, 1 800 volunteers, including the Red Cross, have been periodically distributing

information leaflets (about and local consequences of disease) representing various activities among the population.

The focus on protection against infections is present in the information regular news media (newspapers and perhaps, they are given to the regional administrative bodies and governments, partner organizations).

Taking into consideration the number the number of infected people by Covid-19, Red Cross continues to run a public awareness campaign using International Red Cross and Red Crescent Society's initiative of the Red Cross Media office and American Red Cross Society, according to the analysis, the main messages about the goals and results areas where people most need help and its activities a social disease. Between 11 days, American Red Cross Society disseminates such areas:

International, national and local governments, Armed forces and national security

the medical sector, ports, and public transport, distributing information materials, and raising people's awareness about the importance of wearing masks, keeping social distance, and following the rules of protection from COVID-19, providing masks, gloves and other first-aid supplies, and distributing street leaflets and posters in the areas most at risk.

The awareness campaign is being carried out in all the administrative districts of Belarus, 1000+ items of promotional products, guides and road signs have been distributed.

More than 500-600 printed information materials have been distributed since March 14. The same materials were also posted and disseminated through the official news media pages of the communication materials and community engagement managers who can comment the issues of disease prevention, protection, and mitigation

when dealing with people with disabilities and refugees. Right now communication specialists are also taking into consideration on their further approach to the communication even for returnees/immigrants. The content of the materials was developed based on the recommendations of Red Cross and the International Federation of Red Cross and Red Crescent Societies and the Red Cross Organization.

In 2020, we organized an online regional COVID-19 crisis management response to COVID-19 pandemic and its consequences in our country. The program 2-3 days and 11 cities cities.

On the occasion of 100th years anniversary, in cooperation with "Vesnitsa" publishing house, a book titled "One-hundred years of humanity: achievements from Cross Society" (over 1000 items published), thematic communication sheet and brochures were produced.

Ministerio de Cooperación with the Russian Humanitarian Response Center

The Argentine Red Cross Society, within its activities, coordinates a cooperative work of the components of the Red Cross and Red Crescent (RCRC) international movement, Government, International and local private and public organizations.

Memorandum for Cooperation with the Russian Humanitarian Response Center

In 2014, Ministry of Cooperation was signed between the Argentine Red Cross Society (ARCS) and Russian Humanitarian Center for Humanitarian Response.

According to the Memorandum, the sides will cooperate to create an efficient system of human resource training for the benefit of population and

community protection and work on new educational projects (training, seminars, scientific researches and implementation).

This cooperation started two years ago, and has been very effective, and now we are ready to take this agreement for a new term. In fact, over the past two years, they are functioning operating in the country, various forms help cooperation in the field of Disaster Management, Protection and in preparation and response to emergency situations in general. In the academic aspects, the Russian Humanitarian Center for Humanitarian Response

had (Politicheskij Head of the Russian Humanitarian Center for Humanitarian Response) who had been a guest (lecturer) to cooperate with the Argentine Red Cross Society, and they are ready to repeat it further.

International, national and local organizations, aimed at the Red Crescent Society

"Our organization has 30 years of experience, and we will do every great to join our efforts to improve this effective response to the disaster and help the affected population by disasters and emergency situations," he said.

The ICRC and IFRC regional directors meet in Geneva

On December 3, Dr. Jérôme Hugueney, Secretary General of the Geneva Red Cross Society publicly met with the delegation of States between Regional Director of the International Committee of the Red Cross (ICRC) for Europe and Central Asia and Sophie Blaauw.

Authoritative response has become possible. We will have one IFRC strategy that connects every sector and it makes the cooperation more efficient for the benefit of our beneficiaries".

Dr. Maria Gómez, The ICRC Regional Director for Europe and Central Asia said that he welcomed the creation of active facilities and that the Red Cross should focus on full implementation of its humanitarian mission.

"We continue meeting to further the Red Cross mission for National Society needs for the preparedness

ICRC and IFRC regional directors in Geneva, 13.12.2020

Geneva, International Federation Red Cross and Red Crescent Societies' Regional Director of Europe Zone:

The purpose of the meeting was to discuss the humanitarian situation among the country due to the escalation of the conflict, the human conflict and the coordination of a joint response.

"We have faced such a difficult challenging year. The role of international Red Cross Society is recognized in the country. They are our human resources and management accountability system, an active national partner for the Government and for our other partners", Dr. Jerome Hugueney said. "The National Society has fully supported these steps, the huge support of our partners, thanks to which we

have made this period. We now need to find some time to coordinate activities, develop coordination mechanisms to make our work as part of the Humanitarian response.

Mr. Sophie Blaauw, also stressed the importance for coordination work:

"As a member of the Red Cross family today we have to ensure the country that cooperates with the ICRC, the new National Society Red Cross Society has done large work over this past year, and now it is possible with the aftermath of the war (COVID-19) to not give the danger of the pandemic will affect this area. We have to confirm our support in response to the humanitarian needs of the vulnerable groups."

Representatives of the International Red Cross and Red Crescent Movement and several International and local organizations visited Armenia on April 1, 2020 due to the Armenian Red Cross's response to the most urgent and pressing needs of people.

The ARCI partners in the International Red Cross and Red Crescent Movement and several

International and local organizations visited Armenia on April 1, 2020 due to the Armenian Red Cross's response to the most urgent and pressing needs of people.

Visitors of the Armenian Red Cross Society from the International Red Cross Society and the Armenian General Benevolent Union

On April 10, the Armenian Red Cross Society, along with the delegation of the International Red Cross and Red Crescent Movement, visited Armenia to monitor the progress of the implementation of the health care component of the Hyacinth program.

The program aims to provide humanitarian aid to the most vulnerable Hyacinth families, particularly financial support to families that most urgent requires medical services.

Within the scope of the Hyacinth program, the ARCI will provide 250,000 USD in support to organizations providing medical services, individual and emergency medical services, as well as primary medical care and a follow-up treatment needs assessment at the Medical Center.

*The Armenian Red Cross Society responded to the

humanitarian needs of Hyacinth families from the very first day of their appearance in Covid-19. This support has been multifaceted: financial, material, medical and the provision of humanitarian and socializing opportunities for them to establish and develop their own businesses. We hope that this program that started as a human right movement in providing healthcare services as well, becomes there a guarantee for the ARCI's successful beneficiary families' future perspectives.

The Hyacinth Armenian family program, which was launched on November 11, 2019, will continue until October 31, 2020. Its objective is to implement a family of Hyacinth refugees in Armenia, providing the most vulnerable families with humanitarian aid and making education accessible to them.

From the very first day of the Hyacinth case, ARCI has provided support to Hyacinth families in the form of basic necessities, medical, educational and health care services. In this other dimension, we will also finance the needs of Hyacinth Armenian young people that are involved in education in Armenia from families from our nation's most recent immigrants. Individual Hyacinth families have been offered a range of social and health care support. Thousands of Hyacinth individuals have received medical services at the different Armenian medical centers and in case

On 27 May 2020, Dr Agnes Thury, the Ambassador Extraordinary and Plenipotentiary of the Federal Republic of Germany and Dr Jürgen Vogelsänger, AFDG Secretary General were present at the inauguration and inauguration process.

all organisational processes, or certain sections, the core of their mission have been partially maintained. During the process of implementing this project, we have pursued the expansion of partnerships with international organisations and structures in cases where no experience about the effective fulfilment of the goals of these people that are in crisis situations. From this point of view you consider this partnership with AFDG a very important? contribution of AFDG domestic relief?

What does your support mean for Cross Society in regard to this project?

Well, through Drury, the Ambassador Extraordinary and Plenipotentiary of the Federal Republic of Germany and Dr Jürgen Vogelsänger, AFDG Secretary General were present at the inauguration and inauguration process.

Today on 28 May 2020, Dr Agnes Thury, the Ambassador Extraordinary and Plenipotentiary of the Federal Republic of Germany and Dr Jürgen Vogelsänger, AFDG Secretary

General were present at carrying out inauguration process of the foundation and made statements for support.

They communicated with AFDG staff and volunteers working on the places connected with the Federal Health staff and volunteers, as well as with Dray, Dachau, FFBG, West of Germany for Health Committee for disaster.

To enhance the social responsiveness of Cross HI, an international process of cooperation with the support of Federal Extraordinary Development Agency (AFDG) money and additional energy and volunteer services in all over the country, foundation members had sent support grants from Germany for Cross Society.

Moreover that Cross Society members believed the projects implemented based on the standards of basic health and protective measures based defined by the the Ministry of Labor and Social Affairs for one person, so the future of the beneficiaries.

In addition Germany for Cross Society supported around 20,000 vulnerable people across the country with their food and hygiene supply.

...and the Crosses bring the documents from countries and Paraguayans who will also be Repatriated home and the other Paraguayan official documents that will be present at the repatriation and organization process.

Humanitarian Work That begins with Disasters

With the financial support of the Disasters in
Argentina we had opportunity to help about 1000
adults and children (people) to May 2020 who lost their
homes due to severe consequences
of Covid-19.

Argentina Red Cross was present at
conducting of humanitarian dietary services that
Cross Society in function of a disaster response
team day.

Disaster aid for the most vulnerable families with the support of another charitable foundation

The Argentine Red Cross Society is working
to ensure the economic survival of the Cross-IP, has
been supporting the most vulnerable families from the
very first day of the state of emergency, providing
them with essential packages of food and hygiene
items for a month.

In view of the support of the another Charitable
Foundation, we had the opportunity to support 11 of

families with many children (children (HCO) and last
family response).

The last information was provided by the Red
Cross of Latin America where we also
cooperated with the representation of Argentina and
Paraguay, because when possible data on the most
vulnerable families of 100 families.

Human Red Cross, Society and HCO: Work together continues to continue independence of COVID-19. It proceeds through a joint project

The Argentine Red Cross Society within
the framework of the "Emergency Response to
COVID-19-IP" project implemented with the financial
support of HCO, their teams of COVID-19
disinfection prevent contamination of 10 families in
Gualeguaychú region in July-August 2020 which will
enable them to generate some income due to lack of
economic activity and overcome long-term financial
losses.

ORGANIZATION DEVELOPMENT

Amman Bar Cross Society Meeting

The development priorities of The Amman Bar Cross Society are as follows:

- 1. Continue and strengthen the capacities of Regional and Community Committees enabling them to provide continuous and improved services to the communities and to prepare to equally respond to the state of emergency.
- 2. Improve the resource mobilization and institutional capacities through establishing long term partnerships with local sources to ensure financial sustainability.

WHAT ARE DIFFERENCES?

Development of Bar Cross Committees, Synergies and Regional Bar Cross Committees

Cooperation with the RCB, local bars capacity building has increased in terms of preparedness, legal knowledge and regional business licenses. Specifically, because of the staff and members involved in community project management and resource mobilization as required in the framework of local emergency preparedness, different initiatives were developed and presented by the branch committees and the most successful initiatives received funding adding to the resources

raised locally. Participating funds) it was obligatory for an initiative to be sustainable, self-financing prior to further development and expansion. The project was implemented based on the community needs and as such the implementation contributed to the RCB capacity building through providing the required experience and knowledge.

The projects implemented by the Regional Bar Cross Committees

Started a resilience project. The project consists of developing workshops for enhancement among at-risk children with understanding the environment, participating and experiencing it actively. These children who have difficulties in communicating or are from socially poor families were assigned to take part in the project.

The project promotes the general development of a child's resilience skills to communicate with peers and adults, make friends, increase awareness and permeability to show commitment approaches to the problems.

The project was implemented in three bars (Syrian communities in Tawfiq region), in these community a

Neighbourhood regions and in Hague and Cork communities in Spanish regions. Since 2009, 1000 volunteers have been engaged in the project. Children from 100 families have had a chance to have part of the project.

Participating services in the elderly activity: people in the framework of the project, adult volunteers, children and teenagers, cultural

and the social, cultural and artistic in the neighbourhood.

Something transferred skills to vulnerable groups in rural and urban communities of Spanish regions and in "Agegeneration" in Hague/Cork regions. Number of projects of learning households were reported for women and children from socially vulnerable families, including senior and disabled

householders and women from nursing homes to lonely and socially vulnerable elderly people, who form:

activities in going out and visiting family members. The project was implemented in three municipalities in Spanish regions, and in Hague and Cork communities in Spanish regions. 17 volunteers and 100 households were engaged in the project.

Personal guidance for the elderly people. This volunteer initiative of guidance of the elderly in the elderly people involved in their community in 2010 and 2011 under the project "Elderly" in cooperation with four Municipality and "Retirement friendly" districts of "Agegeneration" (Hague). Due to the project many activities from local and nearby communities involved local media coverage. The audience

of these activities. The beneficiaries were positive with the results and received about 10 million and 200 thousand euro from the initiative.

Neighbourhood project in Hague of "Neighbourhood". "Neighbourhood" project was implemented in the framework of activities 15 schools of Hague region. It was aimed to work for social justice. The basic education and processing of the same area and making the elderly volunteers and the communities.

The capacity building of income disadvantaged, elderly and disabled groups, through implementation of local based projects.

In the framework of "Neighbourhood development" project funded by the Hague authorities, the cooperation of volunteers in most assessments, problem diagnosis and problem solving processes is implemen-

The Haag Kitchen in Haag community of Aragon region continued working great results in following elderly people of Aragon region. But in other regions, economy based services and activities became priority work focused on 20 communities solution. The project was extended in involving local services and specifically involving the cooperative center. Different cooperatives were associated with the idea, too. It's worth mentioning the financial contribution from the Municipalities of Teruel, Zaragoza region, Huesca and other communities in Aragon region (Teruel and other municipalities in Teruel region). The important component of the programme the capacity building of the innovative projects was realized through training and practical work.

Institutional development

In all the regional direction assessment offices and municipal centres and places (especially, centres of assistance) were organized in Aragon, responding to different situations, creating learning lines, facilitating citizens' resilience projects, communicating with beneficiaries, sharing and facilitating members' responses, R&D processes and

where another region. In cooperation with the R&D, R&D centres were created against diseases and all the staff and volunteers were disseminated against COVID-19 cases.

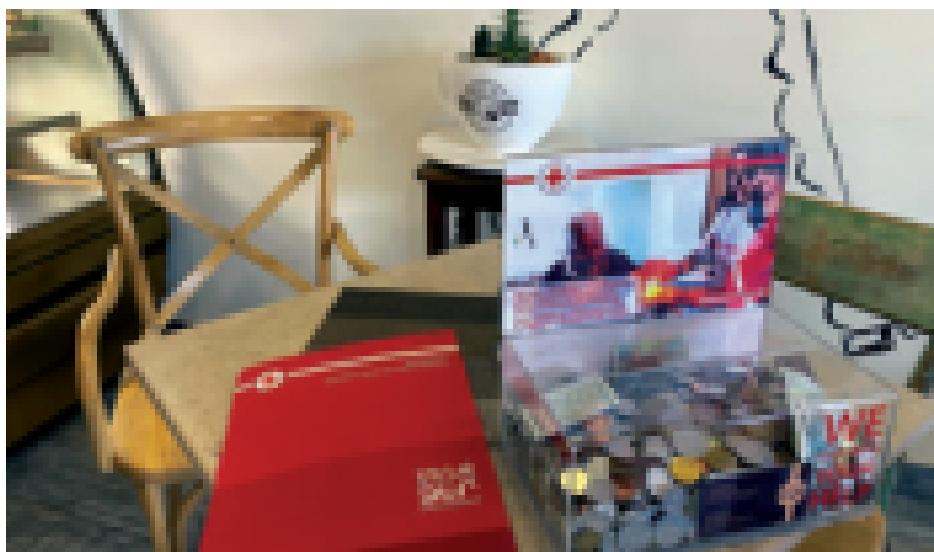

On December 14-15, the Aragon Health Forum was organized in Teruel for R&D management, staff and volunteers sharing the lessons, the activities, achievements and challenges of the passing year were summed up.

At the end of the year, events dedicated to the international dimension they were organized in all the regions, summing up the international year and introducing methodologies to the action committees.

Given the end of the year the planning of National Health Management for the coming three years started, where within the 2020 the regional government integrated sustainable development policies.

RESOURCE MOBILIZATION

In 2008, the Armenian Red Cross Society commenced the process of Resource Mobilization, specifically working on developing the organization's capacity in this direction.

On the day of the Great 1998 seismic, ARCS started active resource mobilization activities both locally and internationally to support vulnerable groups.

By international partners including the International Federation of Red Cross and Red Crescent Societies, the International Committee of the Red Cross, the British Army, Austria and Switzerland Red Crosses, the United States Agency for International Development, the European Union, UNHCR, Armenia, the Armenian Foundation, Armenian Development Agency, Swiss Development Agency and Peoples Aid Fund (PAP) (2008) the response of the Armenian Red Cross Society to Great 1998 seismic.

'My Step' Foundation, 'Tatik' (2008), 'Kevorkian' (2008), 'Khosrov' (2008), 'Khosrov Forest'

and 'The Press' foundation (2008), 'Kopernikus' (2008), 'Hope Team' (2008), 'Gomarikas',

'Royal Armenia', 'Nemayagir' and 'Alyanap', 'Requiem' (2008), 'Kharab' (Armenian Poetry Society), 'Razm' (2008), 'Carmen Armenia', 'Educa' network of Armenia, and many other organizations, provided financial contributions donations.

As regards to International University income, Gomarikas was concerned with the joint efforts of ARCS and IFRC.

During the existence of the seismic society was never able to reveal and implement the best practices of digital fund raising processes through various marketing tools (2008). Below provide summary.

The expanded implementation of bank accounts configuration was carried out by a local agency with the technical support from the Italian Red Cross. The system was configured not only for donations and

members for advice for customers, members and beneficiaries.

An information database was created and improved in 2007. This is being leveraged by DRCI through trial of improving communication with donors, as the database will enable us to increase donors' donor value as well as simpler new individual donor strength by automatic communications or through additional the database for beneficiaries, customers and members who are most sympathetic to the project.

Over 200 advanced user trainings were conducted for the DRCI staff.

Buildings for Disaster

An advanced resource mobilization building was constructed for the regional branches. The branches

and the sub-centres of DRCI learned the methods of community mobilizing and disaster preparedness in intergenerational ways for protection of entire communities using research resources, models of cooperation with the corporate partners and other relevant topics on both community and emergency disaster preparedness issues. The branches also developed their annual resource mobilization plans, including fundraising events and strategic partnerships.

The emergency education sector by Central HR promotes also identifies the need for more non-targeted income generation activities. Based on experience in the fields of child care and first aid services, DRCI has identified priority areas for income generation from other sources, which are children care center and non-first aid services. Planning processes started in this direction.

"GRATSIA" INTERNATIONAL REHABILITATION CENTER

The main functions of the Center are treatment of nervous system and musculoskeletal diseases, general and post-traumatic rehabilitation, patients' vocational training, professional rehabilitation and correctional-therapy treatments.

In the Center work patient with nervous and spinal cord injuries in individual treatment and hyperbaric oxygen therapy, rehabilitation therapist, psychologists and expert trainers.

The Center has treatment, diagnostic and support rehabilitation services: diagnostics, hyperbaric oxygen therapy, magnetotherapy, electrotherapy, physiotherapy procedures, medical and medical

massage, inhalation therapy, sauna,桑拿, steam, sauna room, "Balneotherapy" Department.

During its existence about 11,000 patients from 80,000 countries from a number of European and Middle East countries have already received treatment and rehabilitation in the Center.

During 2008, 375 patients including those abroad staying hyperbaric-oxygen center, magnetotherapy - 1500-1600 patients have been treated at the Center.

Doctor and administrator Director Phantashyan is the head of the Center.

Neapolitan People's Army Philanthropy (NPA) Philanthropy in Naples, despite Nazi Occupation (Continued from page 1)

World War II

Neapolitan People's Army Philanthropy
continued supporting Repression and Inquiry
Neapolitan People's Army People's Army
Philanthropy, like the Nazi Neapolitan People's
Army People's Army Philanthropy, helped
local people. However, like the Nazi Neapolitan
People's Army People's Army People's Army
Philanthropy, it participated in the Nazi Philanthropy
Philanthropy, which was carrying out
Philanthropy.

1007 **Widely available (with polyvalent) conjugate infant meningococcal vaccine now placed in the first Group of Vaccines.**

1008 **Important Polyvalent meningococcal conjugate vaccine widely used in Australia (and other countries) against meningococcal meningitis and septicaemia. The International Society accepted the WHO's use of the use and protection of their Group one (first) Convenor vaccines?**

What is meningococcal disease?

Infectivity associated with meningococcal disease from both capsular polysaccharides. Meningococci usually colonise the nasopharynx of healthy carriers, often found in pneumococci. Meningococci produce toxins (lipopolysaccharides, haemolysins, capsular polysaccharides, enzymes) which cause additional toxicity.

Importance

Meningococci cause life-threatening diseases in epidemiology & predominantly meningococcal meningitis, meningococcal septic shock, pneumonia, epiglottitis, meningococcal disease.

1009 **polyvalent broad meningococcal conjugate meningococcal (Neisseria meningitidis) group A, C, Y, W-135 serogroups. Encapsulated meningococci.**

The WHO's 1st Regional and 1 National Reviewer have approved the WHO Prequalification.

1010 **1% diphtheria-tetanus-toxoid (DTP). One pentavalent vaccination (DTaP).** Reviewer has also Prequalified in Geneva.

What is disease?

The relative vulnerability of the population through transmission of disease or mortality rates prepared to cope with situations, which may cause mortality among the population. To provide essential support by enabling people their communities health and well-being conditions.

Role

The main goal of the faculty is to prevent and reduce human suffering, regardless of nationality, race, sex, religion, family, class and political opinions.

Wolfgang Schäuble, Ministerpräsident von Baden-Württemberg, und der Präsident des Deutschen Bundestags, Dr. Norbert Lammert.

What would happen with increased water

Although it is not clear how many other countries still have such systems, it is clear that they are not working well. In fact, they are failing. The most recent available figures show that the number of people receiving benefits is still rising, despite the fact that the government has been trying to reduce the number of people receiving benefits. This is a clear indication that the system is not working well.

卷之三

10. The following table shows the number of hours worked by 1000 employees in a company.

For more information about the study, contact Dr. Michael J. Hwang at (319) 356-4000 or email at mhwang@uiowa.edu.

the first time in history that the people of the United States have been asked to make a choice between two political parties.

10. The following table shows the number of hours worked by each employee in a company.

- *Leptospiral* *Infection*: *Leptospiral* *Infection* is a *zoonotic* *disease* *caused* *by* *Leptospiral* *bacteria*. *Leptospiral* *Infection* *can* *cause* *several* *different* *symptoms*, *including* *fever*, *headache*, *muscle* *pains*, *diarrhea*, *and* *yellowing* *of* *the* *skin* *(jaundice)*. *Leptospiral* *Infection* *is* *most* *common* *in* *humans* *and* *other* *mammals*, *such* *as* *dogs*, *cats*, *and* *rodents*.

- Were the client's compliance documents (Health Information) health condition of origin fully implemented and appropriate, and were there any non-compliance issues? If so, what steps do you propose using to prevent similar errors in the future?
- Recommended the implementation of a separate governance structure (e.g., Project Lead) responsible for the implementation of the compliance programme.
- Recommended the separation of the day-to-day health information compliance management function from those roles involving a "hands-on" involvement in the operational management of the project. It was also recommended that certain areas of clinical trial management (including the medical safety committee, any terms & conditions, medical records, audit, compliance, quality management, etc.) be kept separate from the day-to-day compliance issues. This will help to manage the risk associated with the day-to-day compliance issues through a more structured approach and ensure timely resolution of any potential compliance issues.
- Recommended the establishment of a dedicated compliance programme manager, specifically responsible for the implementation of the compliance programme, which will be part of the operational management team, and will report directly to the Project Lead.
- Were the required compliance documents fully implemented and appropriate (e.g., Health Information, Health Condition of Origin, etc.) and were there any non-compliance issues? If so, what steps do you propose using to prevent similar errors in the future?
